

ROLLER-LOK BINDERS

When Performance Counts

The Roller-Lok mechanism's unique design allows for expansion up to 150% of capacity so that a 4" binder expands to hold 6" of material. Posts bind the material securely in place.

The Roller-Lok provide improved visibility to the binding edge. When using the binder, touch the expansion lever, and the binder expands slightly allowing for better visibility.

These durable binders are meant to last.

Binders are available in regular or heavy duty. Casebound, metal hinge or rugged solid poly cover. Imprinting, embossing, and labeling are available.

R.E.P. INDUSTRIES, INC.
